

CushionSeal™ Inflatable Masks/Kits

An AMICI exclusive, the *CushionSeal™* disposable air cushion masks have human engineered natural contour to provide an excellent seal while promoting patient comfort and cooperation. The transparent material allows for unobstructed patient viewing. The luer lock **Direct Dose** check valve guarantees a “no-leak administration” within the mask cavity.

CushionSeal™ Masks/Kits

All masks are available in time and space-saving **convenience kits**. One package per patient gives you everything you require. The new convenience kits featuring *Extend-N-Bend™* (ENB) tubing are especially convenient. Just grasp the tubing end cuffs firmly around the connected fittings and stretch, gently, to the size you need (within the limits of the tubing).
