PinPoint for Small Field of View Imaging:

PinPoint® for Small Field of View Imaging within MRI provides technologists with the ability to position a marker precisely on a patient's point of pain or a specifically identifiable area of interest. Communication between patients, technologists, and interpreting physicians is streamlined as the area of interest is identified with precision and without any distortion to pathology.

PinPoint® for Small Field of View Imaging
order code: 187
contents per box: 40
6mm Radiance® filled inner diameter
perfect for small field of view imaging in MRI
precisely identifies an exact area of interest in MRI
